

Global Periodic Maintenance Table

AGT Robotics recommends System Maintenance is performed on a "Per frequency" basis. The Global Maintenance Table Excel file contains 3 tabs:

1. Items grouped by frequency
2. Items grouped by component
3. Complete list of all Maintenance items

Each item has a link to a reference document or procedure to explain how to perform the maintenance. The detailed information on each element is being reviewed and contents is being updated.

Important note: Depending on system usage, maintenance frequency may be adjusted
